Summary

Full-stack developer with hands-on experience in React, Node.js, AWS, Docker, and Blockchain. Skilled in building scalable web apps, implementing RESTful and GraphQL APIs, integrating AI/LLMs, and deploying cloud-native solutions with CI/CD pipelines. Passionate about DevOps, Web3, and real-time systems.

Education

- **Motilal Nehru National Institute of Technology, Allahabad** Aug 2023 – Jul 2027
B.Tech CGPA: 7.22
- **Jawahar Navodaya Vidyalaya, Pithoragarh, Uttarakhand** 2022
Class XII (CBSE) Percentage: 88.8%
- **Jawahar Navodaya Vidyalaya, Pithoragarh, Uttarakhand** 2020
Class X (CBSE) Percentage: 92.2%

Experience

- **Swapso.io** Jun 2024 – Jul 2024
Blockchain Consultant Remote
 - **Researched** blockchain trends, prototyped Web3 solutions, and **contributed** to smart contract documentation.
 - **Collaborated** with the team to prototype decentralized applications (dApps), reducing transaction latency by 20%.
- **Morph Systems** Feb 2026 – Mar 2026
Product & Growth Intern — AI Applications Remote
 - **Conducted** customer and prospect research to identify pain points in AI-assisted software development, product adoption, and app deployment workflows.
 - **Built and tested** sample applications using Morph's AI software development platform to evaluate usability, demo quality, and product workflows.
 - **Created** technical storytelling assets, including launch posts, product narratives, and demo-focused content for founders and early users.
 - **Synthesized** user feedback into actionable insights for improving activation, conversion, positioning, and go-to-market strategy.

Projects

- **DarkLang Mode — Chrome Extension** 🗜
 - **Built** a Chrome extension that applies a universal dark mode on any website using adaptive CSS injection and DOM analysis.
 - **Added** real-time language translation by detecting text nodes and updating content dynamically.
 - **Used** Manifest V3, content scripts, and service workers to manage theme logic and user settings via `chrome.storage`.
 - **Optimized** for dynamic pages with MutationObserver to ensure smooth updates on SPAs like Google Docs.
- **Video Calling Interview Platform** 🗜
 - **Developed** a platform to conduct video interviews with integrated real-time messaging and video calling features.
 - Used WebRTC for real-time video communication and Node.js for backend API management.
 - **Developed** features such as scheduling, notifications, and interview recording for further analysis.
- **Chatty** 🗜
 - **Built** a full-stack chat application with real-time communication using **Socket.io**, JWT authentication, and responsive UI via Tailwind CSS.
 - **Implemented** a secure login system with JWT tokens, image upload functionality using Multer, and real-time message broadcasting.
 - **Tech Stack:** Node.js, Express.js, MongoDB, React.js, Zustand, Tailwind CSS, Socket.io.

Skills

- **Programming Languages:** JavaScript, TypeScript, Python, C++, Solidity, Rust
- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind, Redux, Recoil
- **Backend:** Node.js, Express, REST, FastAPI, GraphQL, WebSockets, Authentication, Authorization, Prisma
- **Databases:** MongoDB, PostgreSQL, Redis
- **Web3:** Smart Contracts, Ethereum, ERC-20 / ERC-721 Standards, dApp Development
- **DevOps:** AWS (EC2, S3, Lambda), Docker, Kubernetes, Firebase, CI/CD
- **Other:** Git/GitHub, Jest, Vitest, WebRTC, Team Collaboration
